3 SWISS RULES

Comfort, Quality & Fashion

Comfort

All fabrics for the collection are tested before its production. We use only those materials that meet our high quality standards and not in any way are harmful for your pets. Garments are tailored from the fabrics that always make your pet feel cozy, comfortable and don't cause any discomfort during play, walk or rest.

All the models were tested by different types of dogs to make sure that every piece from the collection fits exactly your pet.

Quality

All the production steps are strictly controlled at our own factory in Europe. All the garments are handmade with great attention to every detail by our highly qualified tailors. Fabrics as well as the accessories for clothes are purchased exclusively from European producers.

Fashion

We are proud to say that the collection was inspired and created by a young and very famous in fashion world Italian designer Simone Galofero with the help of his faithful four-legged friend Chihuahua Yara.

The collection was designed to fit any season and to conform to the latest fashion.

Dress your pet in our clothes to always be on trend!
